ABOUT ME

I am Roshan Thapa, a dedicated developer with a strong interest in both game development and web development. My technical experience includes working with Unity and C# for creating engaging games, as well as PHP, JavaScript, and MySQL for building robust and scalable web applications. Currently pursuing a degree in Information Technology, driven by a passion for transforming ideas into functional, scalable solutions. I am eager to contribute my skills and enthusiasm to a collaborative team environment where I can continue to learn and grow professionally.

EDUCATION

2022-2026 (ongoing) Gandaki University	Bachelor in Information Technology Currently enrolled in 8th semester
2018-1920 Satyawati Secondary School	+2 Science Passed high school with 'B+' grade
2017 Satyawati Secondary School	SEE Passed secondary school with 'A' grade

TECHNICAL SKILLS

Programming & Web Development	HTML5, CSS3, JavaScript, PHP, Bootstrap
Mobile App Development	Android Studio, React Native, Java, TypeScript
Database & Backend	MySQL, Firebase, Supabase, Drizzle ORM
Tools & Platforms	Git, GitHub, VS Code, Figma
Professional Skills	Problem Solving, Team Collaboration, Adaptability, Communication, Creative Thinking

ACADEMIC PROJECTS

- **Hotel Booking System**
 - Developed a full-stack hotel booking website using PHP and MySQL.

- Implemented hotel search and real-time room availability tracking.
 - Built secure user authentication and login system.
 - Developed room reservation and booking management features.
- **Movie Booking System**
 - Developed a web-based movie booking system using PHP, MySQL, JavaScript, and Bootstrap.
 - Implemented movie browsing, showtime viewing, seat selection, and ticket reservation features.
 - Integrated Khalti Payment Gateway for secure online transactions.
 - Developed an admin panel to manage movies, showtimes, bookings, and users.
- **Endless Runner Game (Android Studio)**
 - Developed a 2D endless runner game for Android using Java and Android Studio.
 - Implemented jump and slide mechanics, dynamic obstacle generation, and coin-based scoring.
 - Designed a progressive difficulty system with increasing game speed and obstacle frequency.
 - Integrated Firebase Authentication with Google Sign-In for secure user login.
 - Utilized Firebase Realtime Database to store and retrieve player data and scores in real time.
 - Developed a global leaderboard system displaying top player scores and customizable usernames.
- **Car Racing Game (Unity)**
 - Developed a 3D Unity car racing game with immersive gameplay and smooth controls.
 - Implemented garage system with multiple car selection and realistic vehicle physics using C#.
 - Designed race tracks, built AI opponents, and optimized performance for smooth gameplay.

WORKSHOPS & LEARNING

- Laravel
- Bootstrap
- AWS
- Django
- Figma
- Android Studio
- Unity basics
- Artificial Intelligence & Machine Learning Basics

ADDITIONAL INFORMATION

- Strong interest in Unity game development and interactive mobile game creation
- Passionate about web development using PHP, Laravel, JavaScript, and MySQL
- Quick learner with the ability to adapt to new tools, frameworks, and technologies
- Experienced in team-based project development and collaborative problem solving
- Interested in building scalable, user-focused applications and games
- Seeking internship opportunities in game development and web development (IT field)
